

We are happy to announce the  
new exciting feature of  
Product.me

pair.me

- With Pair.me, all Product.me devices can be paired.
- Interaction with one, can trigger multimedia event in another product.me device.
- How? WIRELESSLY
- No infrastructure, no cabling, no hardware needed.

Touch or lift one smartphone and display its characteristics or advertising video on a screen.

Touch or lift two or more smartphones and display comparison in a monitor.

Proximity sensors can be paired with a device that has Product.me and trigger multimedia events.

- Pair one smartphone or tablet to Play.me and compare headphones or speakers.
- Pair one smartphone or tablet to Power.me and power any device for comparisons.
- Various sensors can be paired with a device that has product.me and trigger multimedia events:
  - Product.me wireless Button
    - Customer count sensor
    - Face recognition camera
      - ESL label
      - Proximity sensor
    - Temperature sensor
